

AMENDMENT TO THE CLAIMS

- 1-17. (Cancelled)
18. (Previously presented) A method, comprising:
- receiving an image from an image capture device, in which the image capture device generates an image of an area in which human activity is desired to be substantially nonexistent;
- determining information related to the area;
- receiving a request for a first user to monitor;
- receiving a user identifier;
- verifying that the user identifier corresponds to the first user;
- providing the first user with the image;
- receiving a response to the image by the first user, in which the response is one of: an indication that a human is present in the image, an indication that no human is present in the image, and an indication of uncertainty whether a human is present in the image;
- providing additional users with the image;
- receiving responses to the image by the additional users;
- evaluating the received responses;
- determining, based on the information related to the area, an entity to notify; and
- notifying the entity.
- 19-60. (Cancelled)
61. (Previously presented) A method, comprising:
- receiving an image of an object from an image capture device situated in a particular area;
- routing the image of the object to a plurality of remote viewers;

requesting that each remote viewer of the plurality of remote viewers provide an indication of whether the image of the object matches a reference image of a particular object; and

receiving, from each remote viewer of the plurality of remote viewers, the indication of whether the image of the object matches the reference image of the particular object.

62-75. (Cancelled)
